PROFESSIONAL EXPERIENCES

MACHINESTALK July 2023 - August 2023

SUMMER INTERSHIP - INTEGRATION OF OPENAI WITHIN THE DEVELOPMENT PROCESS

The main idea of this project is to develop a dynamic web application that can track a user's devices. This development process will unfold using two approaches: one where we manually code everything, and the other where we harness the power of ChatGPT to generate code. By comparing and analyzing these two methods, we aim to uncover their respective strengths and limits.

Ukla Software june 2022 - june 2023
